## FinOps - Certified FinOps Practitioner

### Course Overview

Master Cloud Financial Operations and become a certified FinOps practitioner. This comprehensive program teaches how to optimise cloud costs, implement financial governance, and drive strategic cloud economics across AWS, Azure, and GCP. Gain industry-recognised certifications and hands-on experience through real-world projects.

Real Time Instructor Training

Daily Quiz

Mentor Support

Resume Preparation

Weekly Mock Interviews on Softskills & Technical

3 Real Time Projects

**Duration:** 5 Weeks | 30 Hours

**Format:** Live Online Classes + Hands-on Labs + Self-Paced Learning

**Certifications:** FinOps Certified Practitioner + 3 Cloud Certifications

**Support:** 100% Job Assistance

### Why Choose This FinOps Program?

- ✓ **Industry-Aligned Curriculum** – Based on FinOps Foundation Framework
- ✓ **Multi-Cloud Coverage** – AWS, Azure, and GCP cost management
- ✓ **Real-World Projects** – 2 portfolio-ready capstone projects
- ✓ **Expert Instructors** – 16+ years of cloud financial management experience
- ✓ **100% Job Assistance** – Resume building, mock interviews, placement support
- ✓ **Certification Preparation** – FinOps Certified Practitioner exam prep included
- ✓ **LMS Access** – 1-year access with downloadable resources

### Prerequisites:

- Basic understanding of cloud computing concepts
- Familiarity with at least one major cloud provider (AWS, Azure, or GCP)
- General knowledge of IT infrastructure and pricing models
- Basic financial and budgeting concepts
- **No formal prerequisites required** – all fundamentals covered in the course

Contact Us: +91 7680001943 | +91 9502765632 | [hr@rrtechnosoft.in](mailto:hr@rrtechnosoft.in) | [www.rrtechnosoft.in](http://www.rrtechnosoft.in)

## Phase 1: Foundation (Weeks 1–2)

### Master FinOps fundamentals and cloud economics

#### Module 1: Introduction to FinOps

- What is FinOps and why it matters
- FinOps Framework overview
- Cloud Financial Management principles
- Business value and ROI of FinOps adoption
- FinOps lifecycle and maturity model
- Industry best practices and case studies

**Real Time Instructor  
Training**

**Daily  
Quiz**

#### Module 2: FinOps Framework & Core Principles

- Three pillars: Inform, Optimise, Operate
- Six FinOps principles in practice
- Stakeholder collaboration and alignment
- Cultural transformation strategies
- Building a FinOps Center of Excellence (CoE)

**Mentor  
Support**

#### Module 3: Cloud Economics Fundamentals

- Traditional IT vs Cloud economics
- Usage-based pricing models
- Cost models and pricing strategies
- Unit economics and business metrics
- TCO (Total Cost of Ownership) analysis
- ROI calculation methods
- Introduction to FOCUS Standard (Finops Open Cost & Usage Specification)
- What FOCUS is and why it is becoming the universal billing standard
- Overview of the FOCUS column schema and key data fields

**Resume  
Preparation**

**Weekly Mock  
Interviews on  
Softskills &  
Technical**

#### Module 4: Budget Management & Forecasting

- Budget planning for cloud environments
- Forecasting techniques and models
- Variance analysis and reporting
- Budget alerts and controls
- Financial planning cycles
- Capacity planning and predictions

**3 Real Time  
Projects**

## Phase 2: Implementation (Weeks 3–4)

### Deep dive into Cloud Billing & Cost Management

#### Module 5: FinOps People, Culture & Personas

- Building effective FinOps teams
- Organisational structures (centralised vs federated)
- Roles and responsibilities across the FinOps lifecycle
- Stakeholder engagement and change management
- Executive (CIO/CFO) persona — priorities and communication
- Engineering/DevOps persona — cost awareness in development
- Finance persona — cloud billing vs traditional accounting
- Persona-based communication and reporting strategies

**Real Time Instructor Training**

**Daily Quiz**

**Mentor Support**

**Resume Preparation**

**Weekly Mock Interviews on Softskills & Technical**

**3 Real Time Projects**

#### Module 6: Anatomy of the Cloud Bill

- AWS billing: CUR, Cost Explorer, linked accounts
- Azure billing: invoices, subscriptions, management groups
- GCP billing: projects, billing accounts, BigQuery export
- Key billing components and cost drivers
- Consolidated billing and linked account structures
- Common billing pitfalls and how to avoid them
- FOCUS Standard deep dive — how it normalises billing across AWS, Azure, GCP
- Hands-on lab: querying a FOCUS-formatted dataset using Python/SQL
- Mapping AWS CUR and Azure exports to the FOCUS schema

#### Module 7: Cost Allocation & Tagging Strategies

- Resource tagging best practices across AWS, Azure, and GCP
- Cost allocation methods (direct, proportional, even split)
- Shared cost management and distribution models
- Chargeback and showback models
- Tag governance policies and enforcement
- Tag automation with Terraform and policy-as-code

## Module 8: Cloud Cost Optimization Techniques

- Rightsizing compute and storage resources
- Reserved Instances (RIs) and Savings Plans — AWS, Azure, GCP
- Spot Instances, Preemptible VMs, and Spot VMs strategy
- Auto-scaling and elasticity for cost efficiency
- Storage lifecycle management and tiering
- Network cost optimisation and data transfer strategies
- Container and Kubernetes cost management
- Namespace-level cost allocation in Kubernetes
- Pod resource requests and limits — cost impact and best practices
- Introduction to Kubecost for Kubernetes cost visibility

**Real Time Instructor Training**

**Daily Quiz**

## Phase 3: Advanced FinOps (Week 5-6)

### Tooling, Automation, Governance & Multi-Cloud

## Module 9: FinOps Tooling & Automation

- AWS Cost Explorer and Budgets — hands-on walkthrough
- Azure Cost Management and Billing portal
- GCP Billing Reports and BigQuery cost analytics
- Third-party tools: CloudHealth, CloudCheckr, Apptio Cloudability
- Automation with APIs, Lambda functions, and Python scripts
- Integrating FinOps tools with CI/CD pipelines
- Building cost dashboards and automated alerts
- Infracost — open-source FinOps for DevOps teams

**Mentor Support**

**Resume Preparation**

## Module 10: Reporting, KPIs & Maturity Assessment

- Key FinOps metrics and KPIs (unit cost, commitment coverage, waste %)
- Cost visibility and transparency frameworks
- Executive dashboards and reporting templates
- Benchmarking and performance tracking
- Communicating cost insights to engineering, finance, and leadership
- FinOps Maturity Self-Assessment (Crawl/Walk/Run scoring worksheet)
- 5 FinOps domains scored on a 1–5 scale with recommended actions
- Executive presentation template for communicating maturity results

**Weekly Mock Interviews on Softskills & Technical**

**3 Real Time Projects**

## Module 11: Governance & Compliance

- Cloud financial governance frameworks
- Policy enforcement and automated guardrails (AWS SCPs, Azure Policy, GCP Org Policies)
- Compliance and audit readiness for cloud spending
- Security and cost trade-off analysis
- Governance automation with Infrastructure-as-Code

**Real Time Instructor Training**

## Module 12: Advanced Forecasting & AI in FinOps

- Predictive analytics for cloud cost forecasting
- Machine learning models for anomaly detection and alerting
- AI-driven optimisation recommendations (AWS Compute Optimizer, Azure Advisor)
- Integrating FinOps with AIOps platforms
- Building Python-based cost forecasting models
- GenAI workload cost management — emerging trends and strategies

**Daily Quiz**

**Mentor Support**

## Phase 4: Advanced FinOps (Week 7-8)

### AI Forecasting, Capstone Projects & Career Readiness

## Module 13: Multi-Cloud FinOps

- Managing costs across AWS, Azure, and GCP from a single pane of glass
- Unified cost visibility and tagging alignment across clouds
- Cross-cloud optimisation strategies
- Multi-cloud reporting and analytics with third-party tools
- AWS Enterprise Discount Program (EDP) — structure, eligibility, and negotiation tactics
- Microsoft Azure Consumption Commitment (MACC) — how to negotiate MACC deals
- GCP Committed Use Discounts (CUDs) — sustained use vs committed use
- Contract review checklist before signing enterprise cloud agreements
- Real-world vendor negotiation scenarios and role-play exercise

**Resume Preparation**

**Weekly Mock Interviews on Softskills & Technical**

**3 Real Time Projects**

## Module 14: Capstone Projects

- Project 1: Cloud Cost Optimisation for a SaaS Platform
- Project 2: Multi-Cloud Financial Governance Dashboard (AWS + Azure + GCP)
- End-to-end FinOps lifecycle implementation (Inform – Optimise – Operate)
- Peer review, presentation, and panel evaluation
- LinkedIn-shareable case study certificate for each completed project

**Real Time Instructor Training**

**Daily Quiz**

**Mentor Support**

## Module 15: Exam Preparation (New)

- FOCP exam structure, domain weightings, and question types
- 100+ practice questions mapped to all exam domains
- 2 full-length timed mock exams with scoring and feedback
- Domain-by-domain review and targeted revision sessions
- Exam-day strategy: time management, flagging, and review technique
- Last-mile prep checklist and key concept flashcards
- AWS CCP, AZ-900, and GCP Digital Leader exam tips

## Certifications & Career Path:

- FinOps Certified Practitioner (FinOps Foundation)
- AWS Certified Cloud Practitioner
- Microsoft Azure Fundamentals (AZ-900)
- Google Cloud Digital Leader

**Resume Preparation**

## Module 16: Interview Kit & Career Roadmap (New)

- Top 50 FinOps interview questions – technical scenario-based, and behavioural
- Worked answers with follow-up question handling techniques
- India FinOps salary benchmarks by role, experience, and city (2025–26 data)
- Global salary comparison: India, UK, US, UAE, Singapore
- How to negotiate your FinOps salary — scripts and tactics
- FinOps career pathways: Cloud Cost Analyst – FinOps Engineer – FinOps Manager – Director
- LinkedIn profile optimisation for FinOps roles
- Building a FinOps portfolio and personal brand

**Weekly Mock Interviews on Softskills & Technical**

**3 Real Time Projects**

---

### Career Roles After Completion:

- FinOps Analyst
  - FinOps Engineer
  - Cloud Financial Manager
  - Cloud Cost Optimisation Specialist
  - Cloud Governance Consultant
  - Cloud Economics Advisor
- 

**Real Time Instructor  
Training**

---

### Learning Outcomes

- By the end of this course, learners will be able to:
  - Implement FinOps practices across multi-cloud environments
  - Analyse and optimise cloud spending effectively
  - Build financial governance frameworks for cloud operations
  - Automate cost management and reporting
  - Align cloud costs with business objectives
  - Prepare for FinOps and cloud certification exams
- 

**Daily  
Quiz**

**Mentor  
Support**

---

### Tools & Platforms Covered

- AWS Cost Explorer
  - Azure Cost Management + Power BI
  - GCP Billing Reports
  - CloudHealth, CloudCheckr, Apptio Cloudability
  - Terraform, Jenkins, and Python for automation
- 

**Resume  
Preparation**

---

### Support & Resources

- 1-year LMS access with downloadable materials
  - 8/5 mentor and technical support
  - Resume and LinkedIn profile optimisation
  - Mock interviews and placement assistance
  - Access to FinOps community and alumni network
- 

**Weekly Mock  
Interviews on  
Softskills &  
Technical**

**3 Real Time  
Projects**
